

TECNICS PRODUCTS

We Extend Okta's Identity Platform To Desktops

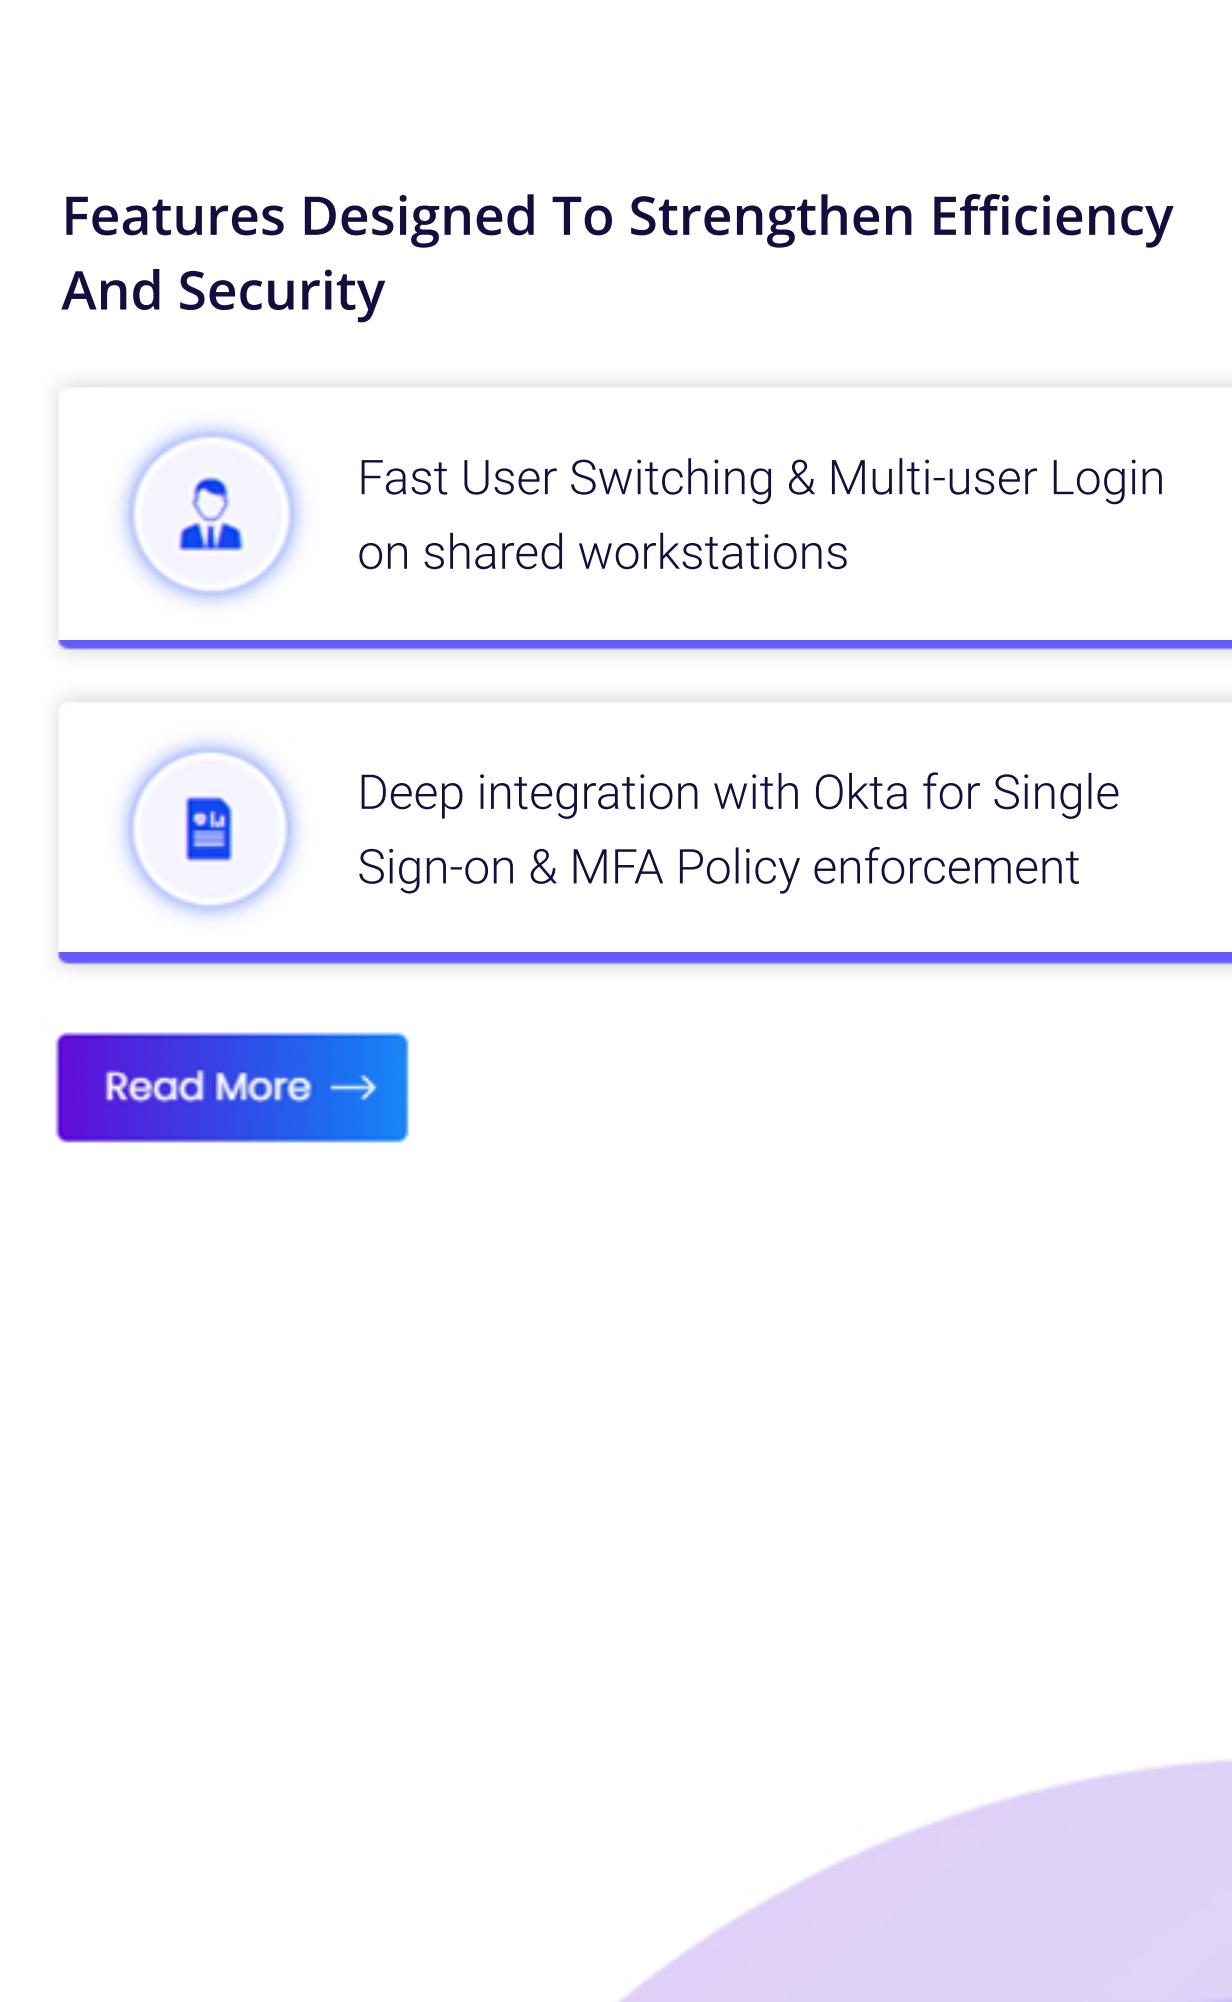

- Highest security standards
- Seamless deployment
- Easy to use

Desktop MFA

FOR OKTA USERS WITH THE FREEDOM TO SECURELY ACCESS CORPORATE RESOURCES ANYTIME, ANYWHERE, EVEN WHEN OFFLINE.

TecMFA is a Credential Provider / authorization plugin developed on top of Okta's MFA & Policy framework and extends the Okta's MFA policy to Windows/Mac desktop & laptops.

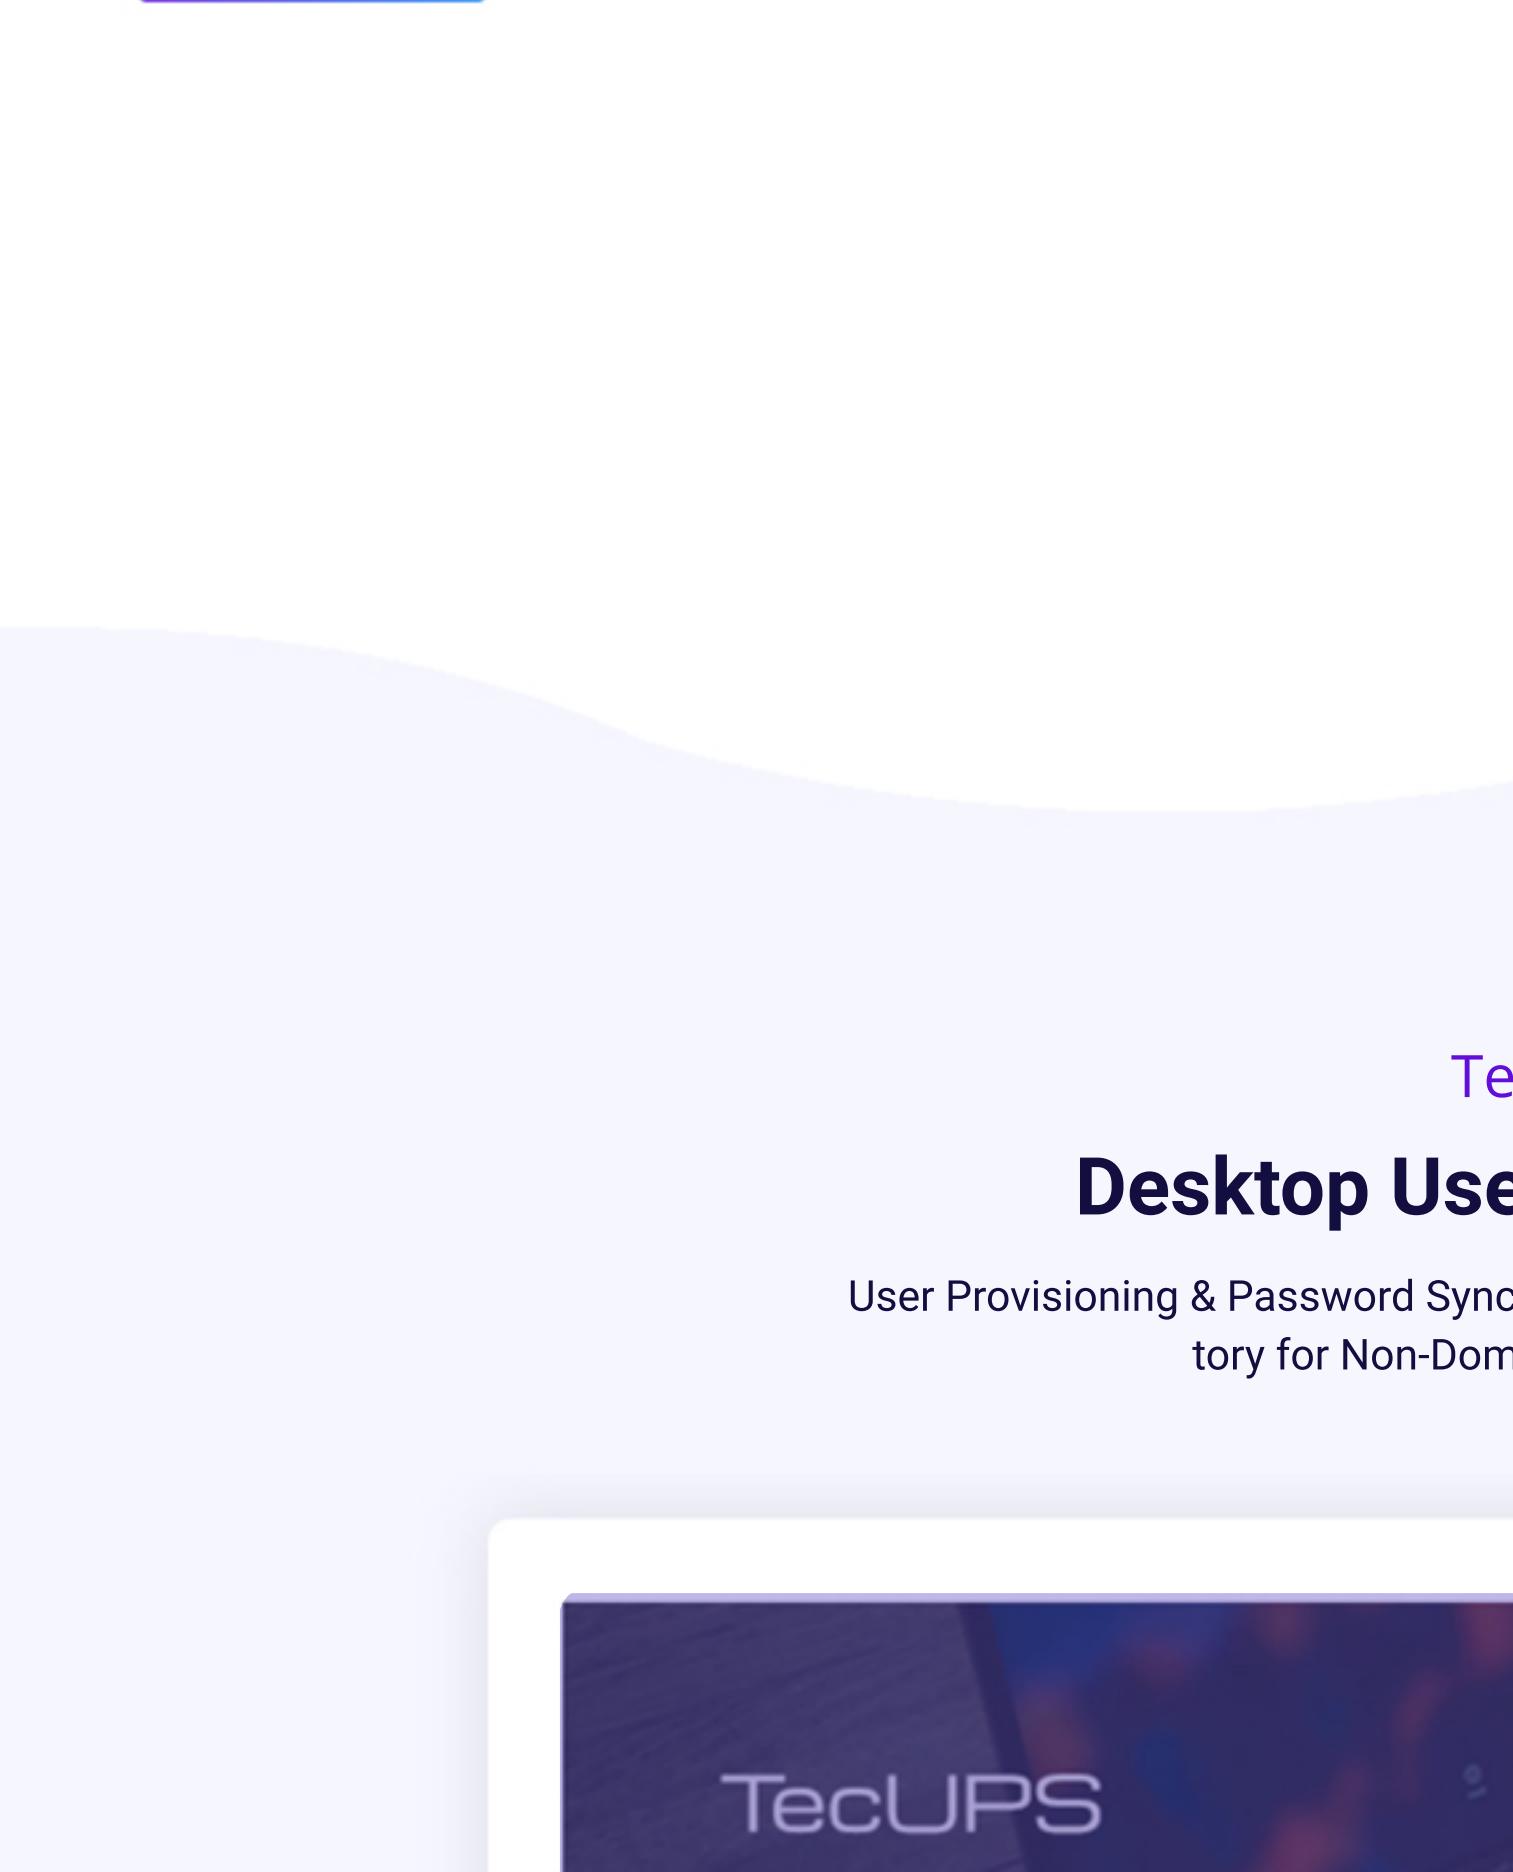

TecMFA prevents vulnerability and threats associated with login by verifying the identity of all users (Employees, Partners, Contractors) with Okta supported 2 Factor authentication before granting access to the desktops/laptops.

TecTANGO

Desktop Smart Card Authentication

TecTANGO is a Credential Provider (CP) for Windows which enables passwordless login to Windows. The passwordless login can be achieved through the following ways:

Features Designed To Strengthen Efficiency And Security

- Fast User Switching & Multi-user Login on shared workstations
- Deep integration with Okta for Single Sign-on & MFA Policy enforcement

TecUNIFY

SSO for Thick Clients

Traditional thick client apps, including desktop or mainframe apps, use external identity stores and do not have federation capabilities. Passwords for all these apps are unique and the user has to remember them.

Massive Productivity increase

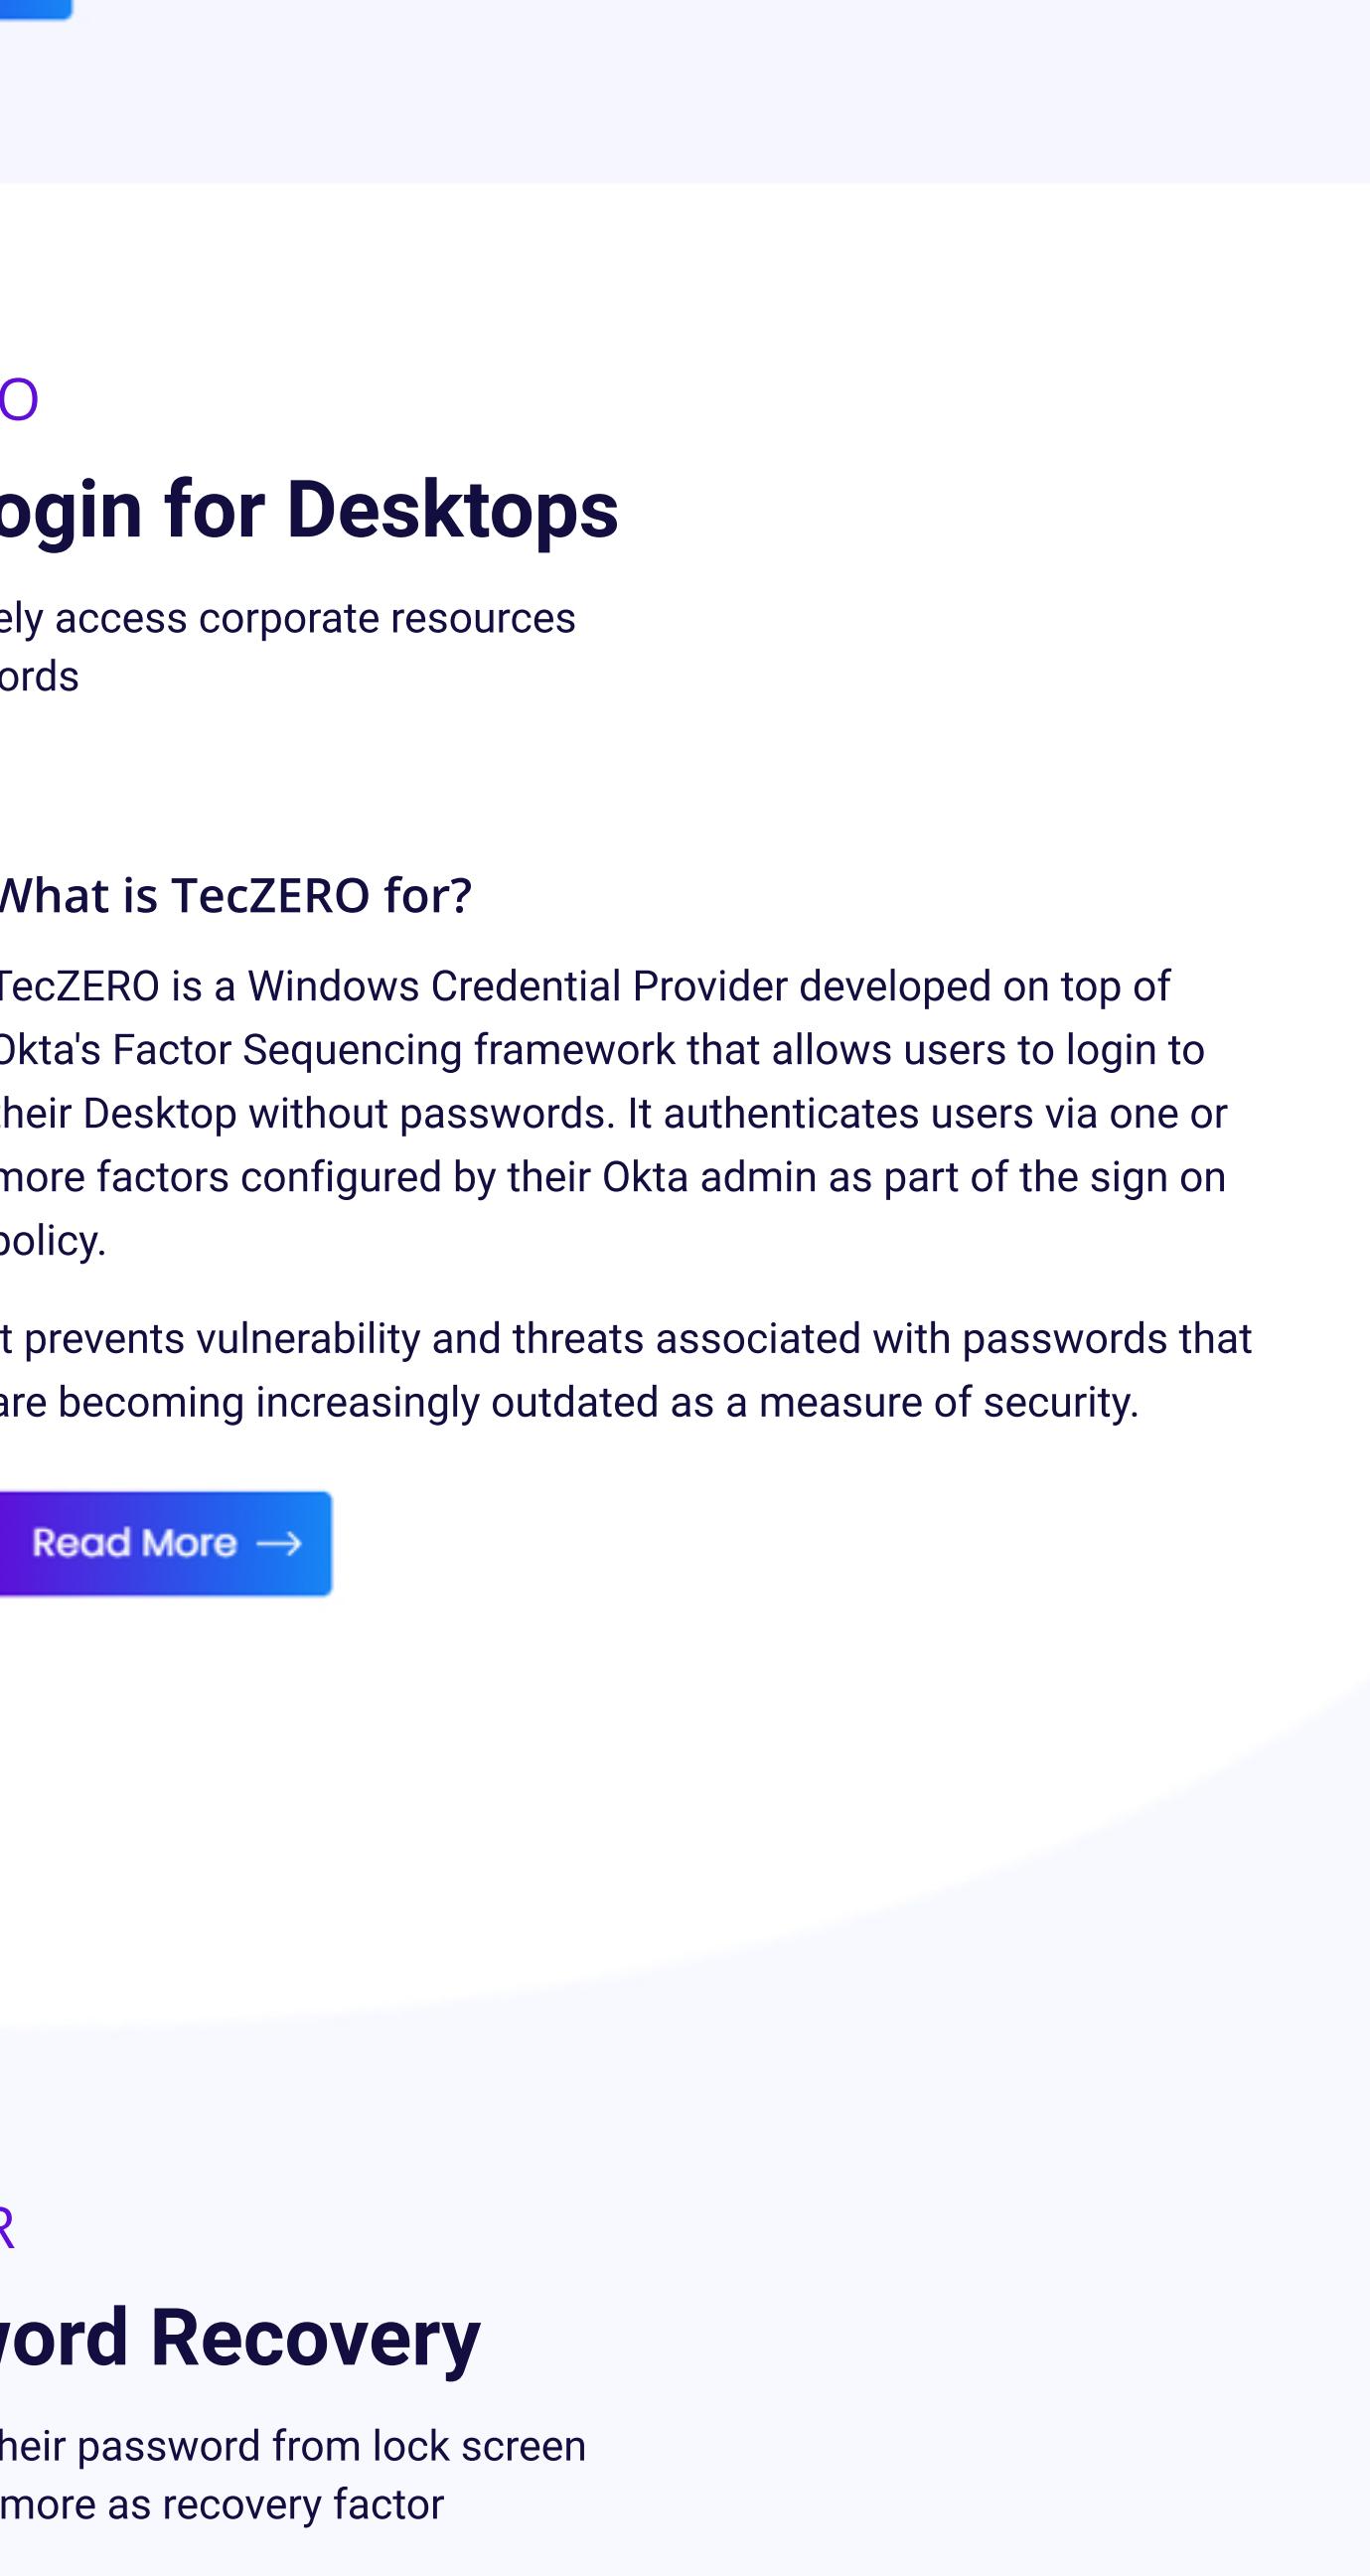

Users don't have to remember each password and enter them every time they log into various apps

Reduced calls to helpdesk

Calls to helpdesk to retrieve forgotten passwords significantly reduced

Improved Security & compliance

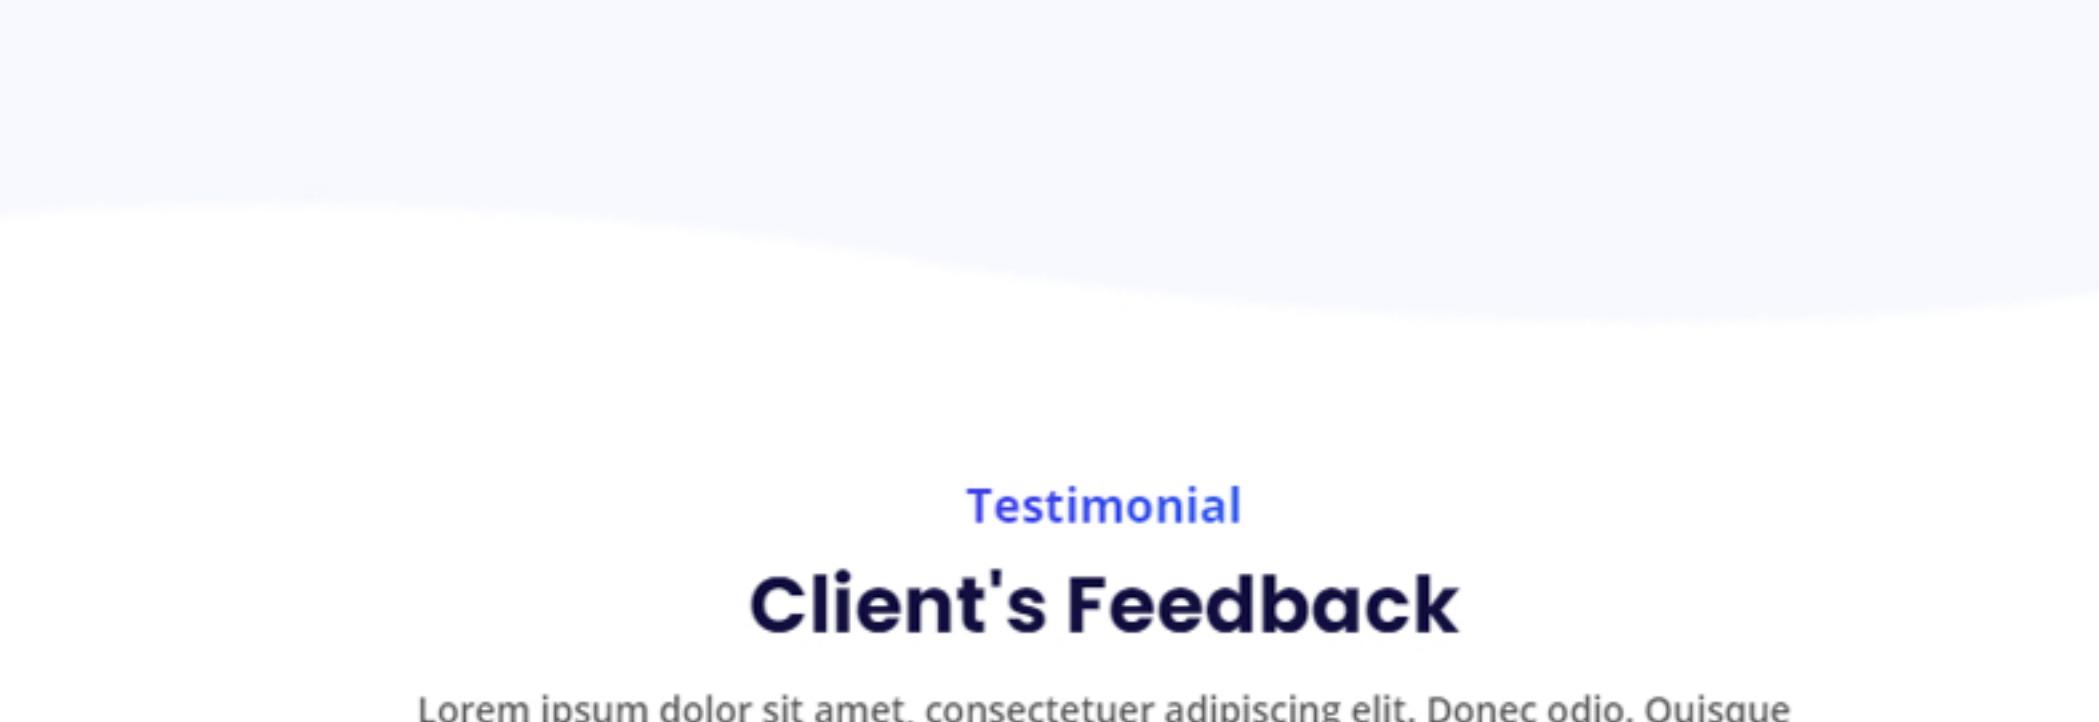

IT teams can set complex passwords for thick-client apps without the burden of users having to remember these complex passwords

TecSSPR

Self-Service Password Recovery

For Okta users with the freedom to reset their password from lock screen Supports Okta Verify, Yubikey and more as recovery factor

What is TecSSPR?

In most organizations, the largest volume of help desk calls is for resetting passwords. The traditional approach for password recovery is time consuming and less secure. "Tecnics Self Service Password Recovery" (TecSSPR) allows users to recover passwords at the press of Ctrl+Alt+Del Keys on their Desktops (Windows 10 or MAC). Users do not have to reach out to help desk or be dependent upon the other traditional methods for password recovery
